Bright TV Mindmap

Frame 2

Frame 3

Data inspection

- check the start and end date of the record time
- Join 2 tables(User profiles and viewership data)
- Count records
- Convert UTC timezone to SAST
- Check for NULLS
- check viewer locations
- Check viewership by day and Month

Audience Insights

- Who are our most engaged viewers? - **Age, Race and Gender**
- Viewer demographics **- Provinces**
- When do people watch most? **- Time bucket**
- High-value viewer profiles
- Underserved audiences
- Churn indicators

Channel insights

- How many channels
- Which channel or content performs best
- Content consumption
- Channel segmentation. **e.g Sports, Music, shows etc**
- Content recommendation
